## Conflict Resolution Day at the Department of Energy ADR LUNCHTIME SERIES PRESENTATION

### Your Brain on Conflict

In this workshop we will discuss basic brain structures and functions - how they affect behavior and are affected by behavior. We will also discuss neurotransmitters that are important in both producing and interpreting behavior. This knowledge will form the basis for a discussion of how we can influence behavior during times of conflict. We will take typical situations faced by managers and employees, and apply the knowledge of neuroscience to guide us towards more smart, satisfying, and effective interactions.
